We are in constant contact with our customers, our billing problems have been solved and we are updating our customer data base.

We believe we are going to suffer another severe summer here causing low water pressure, fire danger and that is not counting, an influx of development.

What is the next step to expedite this CC&N? You are well aware of my stand on this situation. We have in the last few months, addressed every issue that has been brought to our attention except for the upgrading of the water system which is pending the out come of ACC's approval of our CC&N.

Please acknowledge receipt of this letter.

Sincerely

Kyle Parker
